DIESEL FUEL TRAILER / DESIGN / ENQUIRY GUIDE

Diesel Fuel Trailer

Plan your mobile refuelling setup.

Explore the RedDirt diesel fuel trailer concept, then work through the engineering, dispensing equipment and final configuration.

CONCEPT RENDER. This is a design reference, not a photograph of a completed supplied trailer.

1000L tank design target	**1500L** tank design target	**2000L** tank design target	**3500kg** ATM design target

- Custom HDPE diesel tank within a metal enclosure; separate front pump bay.
- The concept uses the same external trailer design for all three tank options.

Design targets only. Final ratings, usable fuel capacity, loaded weights, equipment and approvals remain subject to engineering and configuration.

Check the details.

Concept and design targets - not a final specification. Final supplied equipment and suitability are confirmed in your approved quotation.

Tank options	1000L, 1500L or 2000L design targets
ATM	3500 kg design target; final rating subject to engineering
Tank / platform concept	Custom HDPE tank in metal enclosure; tandem-axle chassis
Equipment layout	Separate front compartment for dispensing equipment
Access concept	Removable roof and side sections around the tank
Pump / dispensing	Flow rate, power, filtration, metering, hose and nozzle to be confirmed
Dimensions / tare / payload	Confirm engineered complete-trailer values; not established by render dimensions
Final inclusions / approvals	Confirm quoted equipment, site requirements and any required approvals

Tell us what the job demands.

1. The fuel volume and refuelling job, access and operating environment.
2. Pump flow, power supply, filtration, metering, hose length and nozzle needs.
3. Tow vehicle, final engineered loaded weights, approvals and delivery location.

A metal enclosure is not, by itself, proof of compliant secondary containment. Confirm any required containment or approvals for the quoted setup. Do not infer usable fuel load from nominal tank volume.

The RedDirt handover.

Five-year trailer warranty. Ask for the written terms and the coverage that applies to fitted equipment.

Imported trailers, inspected and prepared in WA. Work through the final equipment, loading and practical details with RedDirt before handover.

Talk through your setup.
